DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-6, 8-18, 20-29, 31-38, 40, 41, 45-49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Morrison in view of Vaught. The patent to Morrison teaches structure substantially as claimed including a platform (90) comprising one or more individual panels, support frame comprising a support beam (70) supporting the platform, two suspension posts (28, 50) that is vertically adjustable, a fastener (20), the only difference being that the panels do not form a continuous surface. However, the patent to Vaught teaches the use of providing a continuous surface as a platform formed of individual panels to be old. It would have been obvious at the time of the invention to modify the structure of Morrison to include a platform of continuous panels,

as taught by Vaught since such structures are conventional alternative structures used in the same intended purpose, thereby providing structure as claimed. It is noted that the prior art of record further teaches the conventionality of providing a continuous surface, such as platform 40 of Griswold at fig. 1. In response to applicant's remarks, the examiner's position stands as the patent to Vaught teaches the use of a continuous surface supported by a supporting structure. It is this feature/limitation that is a conventional alternative structures that would have been an obvious modification.

Allowable Subject Matter

Claims 7, 19, 30, 39 are being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 42-44 are allowable over the prior art of record.

Response to Arguments

Applicant's arguments filed 06/05/06 have been fully considered but they are not persuasive.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
